# 01 Be a Better Manager

Rome Business School offers Master and MBA programs that can be taken both on campus and online, as well as Executive Education training programs. We always maintain an international vision, and our mission is to train global leaders equipped to manage companies all over the world from an innovative and sustainable perspective.

**This is the meaning of our mission to create better managers for a better world.**

**Antonio Ragusa**  
Dean of Rome Business School

“In a global world, the economy never stops. It fluctuates, driven by ever-growing competition and market uncertainties. Companies that have the best understanding of this new context know that they need versatile, creative, highly adaptable directors;

responsible leaders with the ability to design the strategic approaches of their organizations effectively, with the vision and talent required to succeed on this new playing field. Based on diversity, innovation and sustainability but strongly connected to the market our educational paths will amplify your talents, transform your abilities, and accelerate your career.

Your passion is our fuel and your ideas the starting point from which to make a change both for you and the world. Our students, faculty, staff and alumni members are the driving force behind this change. We are committed to creating future managers, entrepreneurs, and professionals to a level of excellence and ethics in their competences to take the world to the next age of modernity and progress.

The quality of our programs is underpinned by a working atmosphere always connected to the professional world in which the participants share experiences and learn from their classmates. If you are or want to become a proactive person, full of energy, charismatic, a leader to guide your company to success”.

**You're one of us!**

## A Family committed to Global Education

Rome Business School is a member of Planeta Formación y Universidades, an international network created in 2003 by the De Agostini and Grupo Planeta that embodies a strong commitment from both companies to university education and vocational and lifelong training.

This international higher education network boasts twenty-three educational institutions across Spain, France, Italy, North Africa, the USA, Colombia and Andorra. Each year, more than 100,000 students from 114 different countries receive training through its business schools, universities, specialist further education colleges, and vocational and lifelong training centers.

 Planeta Formación y Universidades

As a diversified business division of two large publishing, communication and entertainment groups, **Planeta Formación y Universidades** upholds a set of essential high business values. This leading and enterprising spirit is now combined with the latest technologies and the ambition to deliver for global communities.

# The most International Business School in Italy

It is our belief that, in order to close the gap between the academic world and the job market, we must expand our perspective. This is why, ever since Rome Business School was founded, we have focused our efforts on creating a multicultural, diverse learning environment. We are now the most international business school in Italy, with students coming from more than 150 countries. Therefore, choosing Rome Business School for a higher education program does not just mean receiving a top-level education, but also coming in contact with brand new perspectives and building strong and lasting bonds that span distances.

# Rome Business School's Global Learning Community

Rome Business School strongly believes in an international mission, giving a first role to cross-cultural communication between its students and granting access to managerial education worldwide.

Right from the very early years, Rome Business School has naturally developed international cooperation on a global scale, with a special focus on developing countries. An ethical approach to business and work has to be applied when training entrepreneurs, managers and professionals to a level of excellence in their area of competence. This is the main reason that Rome Business School wants to play a key role in the development of economic humanity and a more prosperous, fair and respectful society focusing on the central role of the individual.

This comprehensive expansion of Rome Business School has therefore not only attracted international students from more than 161 countries to its programs but also, and most importantly, it has given rise to active synergies with other Schools, Institutions and Universities: from running International Study Tours in Rome and abroad to the dedicated Online Short Courses, as well as taking part in institutional events and graduation ceremonies, cooperating in the publications of the Research Center, and much more.

Rome Business School also offers partners services such as legalization of the certifications, customized packages and dedicated lectures and training, along with the inclusion in our Online Library and Virtual Learning Environment.

# Accreditations & Rankings

## Public Accreditations

### MIUR –Italian Ministry of Education, University and Research

Rome Business School has been certified by the MIUR (Italian Ministry of Education, University and Research) as a Research Center, and is listed on the National Research Registry (reg. n° 61598).

### Italian Republic and Chamber of Commerce

Rome Business School is legally certified and authorized by the Italian Republic and Chamber of Commerce to deliver: “management training and consultancy, marketing and communication services, education design, editorial activities by any means, including online publishing, except in the daily press”. n. rea – rm-1364167.

### European Union

Rome Business School is officially registered as a participant organization of the Education and Culture Directorate-General and the Education, Audiovisual and Culture Executive Agency of the European Commission, with the Participant Identification Code (PIC) n° 937625960.

## Business School Accreditations and Memberships

### EFMD

Rome Business School is a Member of EFMD, a global, non-profit membership-driven organization specializing in management development. EFMD is a globally recognized accreditation body for business schools, their programs, and corporate universities on a global scale. It strives to develop socially responsible leaders and managers looking for connection opportunities.

### EOCCS – EFMD Certification

A suite of 4 courses of our Specialized Master Online in HR & Organization within the managerial core competences are EOCCS certified by the EFMD (European Foundation for Management Development). This prestigious certification demonstrates the quality of the Rome Business School online courses. RBS is one of only two business schools in Italy certified by EOCCS-EFMD.

### Asfor Accreditation

Our International MBA, Executive Master in Marketing and Sales and Master in HR & Organization are accredited by ASFOR as one of the best master programs in terms of giving its students an education in management. The accreditation verifies that the Master is qualified to disseminate a 4.0 leadership culture in order to grow a future generation of managers equipped to tackle the challenges of modern society and its digital transformation.

### PRME

Rome Business School is a member of Principles for Responsible Management Education (PRME), a United Nations-supported initiative and a platform for raising the profile of sustainability in schools around the world. PRME equips today's business students with the understanding and ability to deliver change tomorrow.

### EADL

The European Association for Distance Learning represents all the privately-owned and non-governmental European organizations offering high quality and educationally sound distance learning. EADL aims to improve the quality and acceptance of distance learning to ensure the maximum benefit for students.

### PMI - Project Management Institute

Rome Business School is accredited as Authorized Training Partner (ATP) by the Project Management Institute (PMI), the world's largest project management member association.

### CSCMP

Rome Business School is a member of CSCMP, the leading worldwide professional association dedicated to the advancement and dissemination of research and knowledge on supply chain management. CSCMP Italy aims to develop practice, competences and networking among Italian-speaking Supply Chain Professionals.

### DASCA

Rome Business School is certified by ABDA™. The Data Science Council of America (DASCA) is the world's most credible 3rd-party, vendor-neutral certification for young business-school students and those graduating with majors like Statistics, Applied Mathematics, and Economics, dreaming of making exciting careers in Big Data. You can trust the internationally accepted and recognized ABDA™ Credential to prove best, your proficiency, potential, and promise for Big Data analytics.

### PWA

A non-profit networking organization that supports and promotes the interests of professional women of different nationalities, from diverse cultural environments, welcoming women from various professions at different levels and from different sectors.

## Quality

### ISO 9001:2015

Rome Business School has obtained the ISO 9001:2015 certification that accredits the top-quality standards of our training activities. The ISO 9001:2015 accreditation certifies that our organization implements quality systems that provide the foundation for excellent customer satisfaction, staff motivation and continuous improvement.

## Accredited Masters

### What it is and its accreditation process

ASFOR (Associazione Italiana per la Formazione Manageriale) is the Italian Association for Management Training. Founded in 1971, ASFOR's main purpose is the development of Italian managerial culture and the continuous improvement of the quality and competitiveness of Italian managerial training.

The ASFOR accreditation process identifies the excellence of training projects. The programs are evaluated according to criteria that ascertain the solidity of the proposed contents, the teaching quality of the teaching staff involved, the organizational commitment of the promoting educational institutions, economic sustainability and the guarantee of continuity over time.

### What they valued the most from our masters and from our School

As states in the official report by ASFOR, Rome Business School is correctly positioned on the training market in Italy with a strong international focus. The possibilities offered by being part of an international group like Grupo Planeta that it favors are very wide of exchange between schools and its group's activities. The school is evolving very quickly with quality. Excellent logistics characteristics of the campus and a well-structured career service as an integral part of the school's value proposition. There is close relationship with 70 Companies operating internationally. The great satisfaction of the school's stakeholders confirms the correspondence between the objectives of the school, the Master HR & Organization and the MBA and the results achieved.

## Accredited Masters

[International MBA](#)

[Master HR and Organization](#)

[Executive Master in Marketing and Sales](#)

## Certified Masters

### What it is and its certification process

EOCCS - Online Course Certification System is an international online course certification system within the EFMD designed to evaluate the quality of online business and/or management-related courses that stand alone or constitute part of a certificate or programme.

EOCCS provides RBS with a quality-driven international certification system, firmly embedded in the general philosophy of EFMD accreditations: internationalisation, practical relevance and quality improvement.

The process of the certification lasts 6 months and entails an in depth review of courses under a wide range of aspects: planning, design, production, delivery, management, maintenance and evaluation as well as the applied technology and the collaborative elements of the suite of courses taken in consideration. The Panel review of experts involved by EOCCS has interviewed professors, staff and students.

### What they valued the Most from our masters

This prestigious certification demonstrates the quality of the Rome Business School online courses and places Rome Business School among the only 2 Business Schools in Italy certified by EOCCS-EFMD.

Rome Business School has a defined and coherent strategy for online courses/master, which relates to its overall learning strategy. The strategy reflects the Institution's market positioning, resources and any given constraints. The online courses are sustainable regarding the qualifications and experience of the teachers and the technical infrastructure of the Institution. There is an IT-strategy which describes the technology currently used and its sustainability.

## Certification Masters

Suite of four courses as part of Master Programme in HR and Organization: Business Strategy, Marketing, Managerial Economics, Entrepreneurship and Business Planning.

# Accreditations & Rankings

# 02 \_\_\_\_\_ Your journey

# Your Journey

Driven by the will to continuously improve our range of higher educational programs and keeping up-to-date with the trends of the job market, we have developed the Corporate Advisory Board, to embody the spirit of collaboration between students and the reality of the management world.

## Rome Business School – Learning Experience

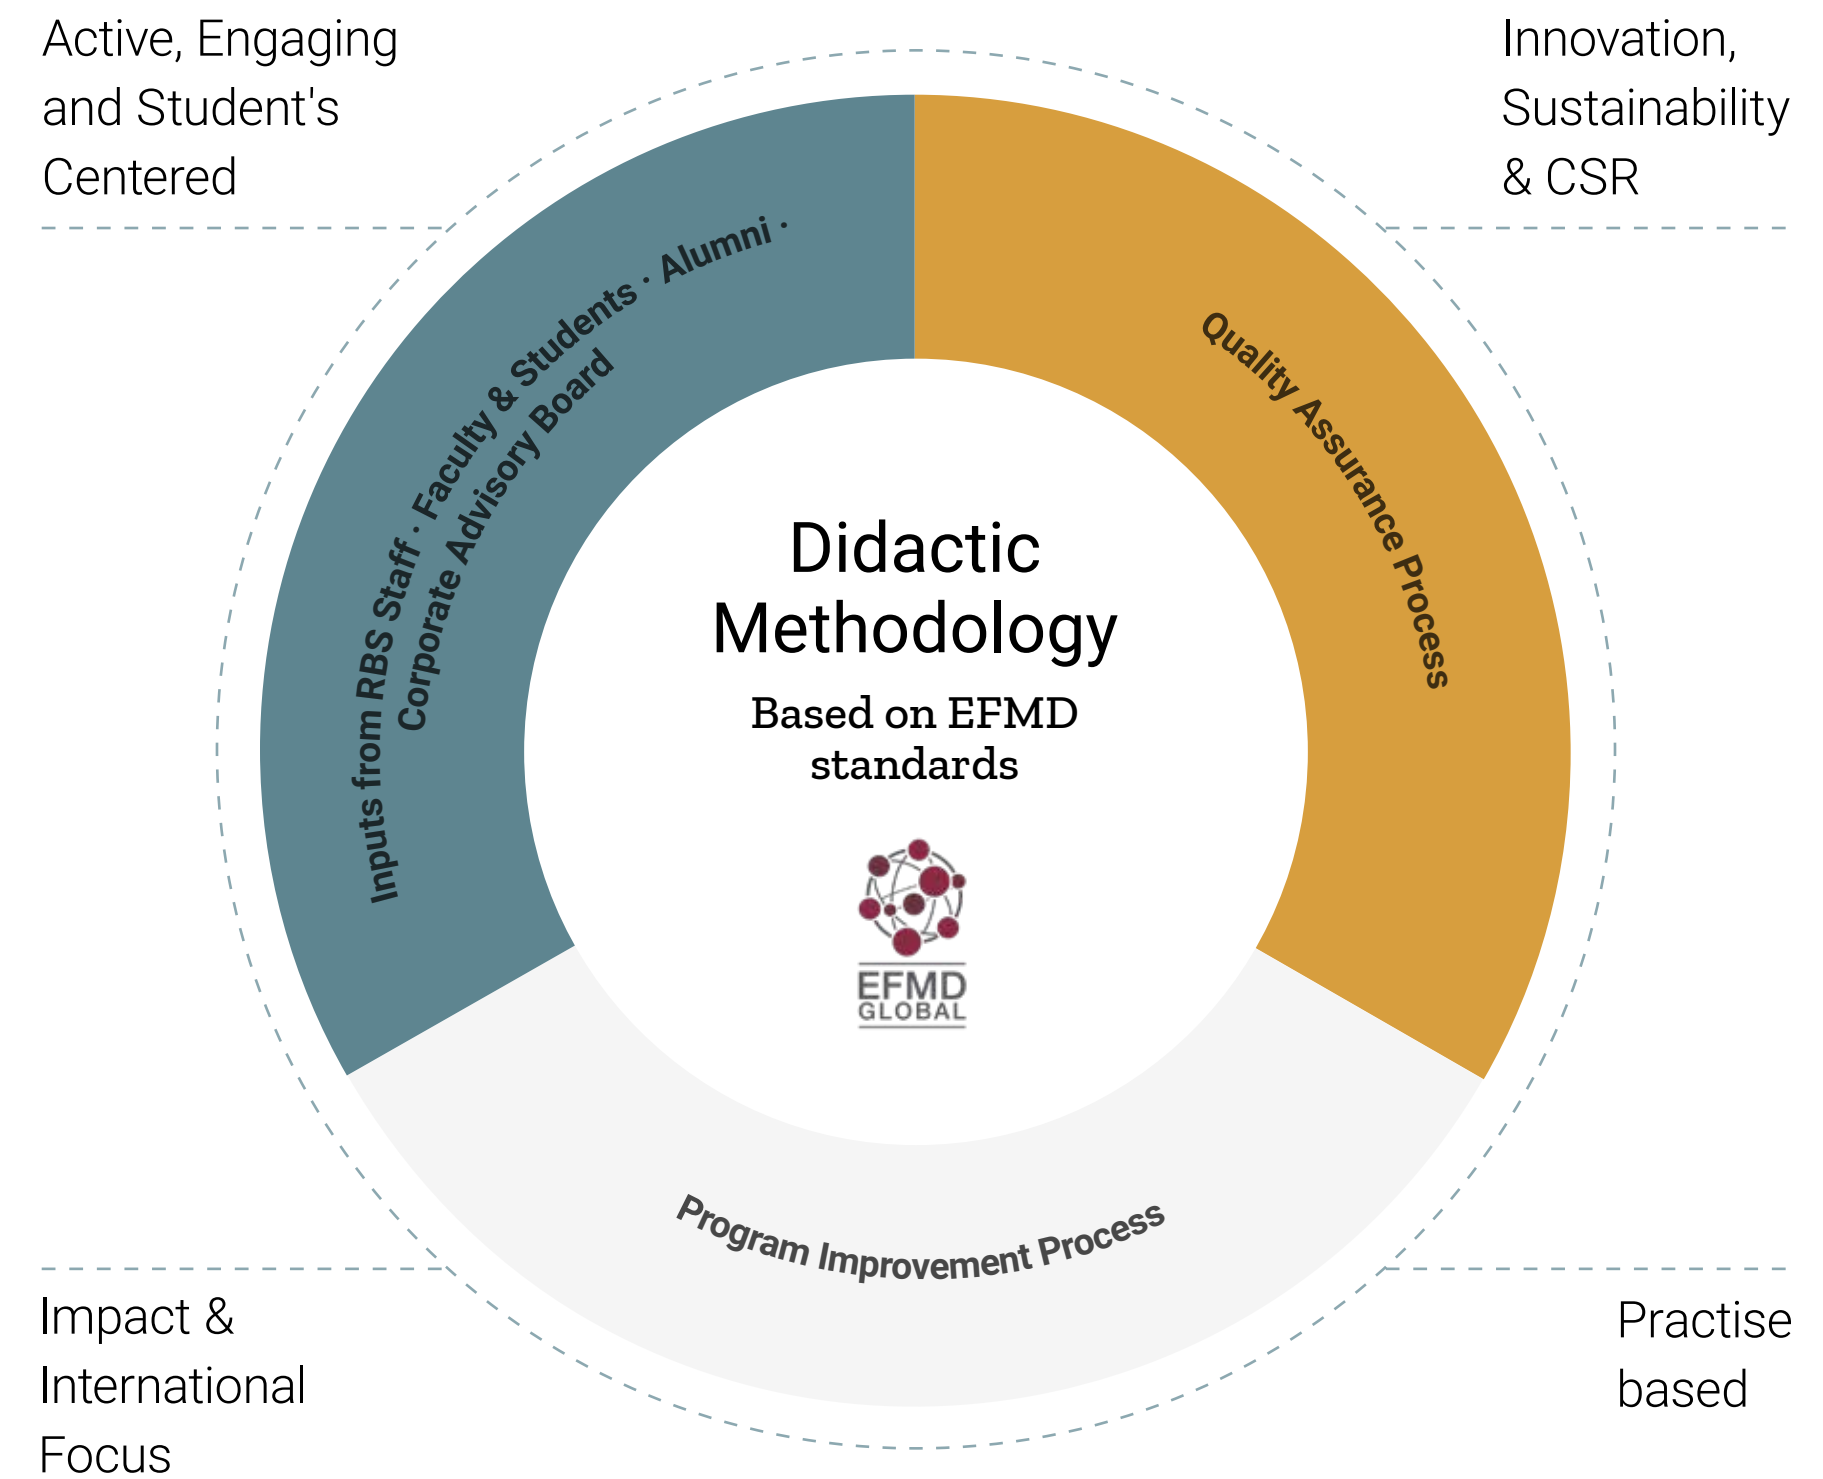

is tailored and built to fulfil the highest standards of quality required to success in the today's working environment.

Shape your professional path and image through 4 pillars:

# The Circular Learning Methodology

Also known as Circular Learning, our Pedagogical Methodology is based on the requirements set by the EFMD Circle for Quality Assurance and so provides highly experience-focused training to professionals and young talent striving to achieve career goals by maximizing their competencies, (technical and professional) skills and leadership attributes.

## The On Campus Methodology is:

- 1 Active**  
with roleplays, class discussions, expressive and critical thinking.
- 2 Engaging**  
Thanks to brainstorming activities, a business case study method, and fieldwork activities.
- 3 Student-centered**  
Focused on providing students with real business situations and challenges. Students are the central point whereas professors are facilitators in each and every lecture.
- 4 Focused on Innovation and Sustainability**  
The real world needs real sustainable action, which is why we train our future leaders to be as ethical and environmentally friendly as possible throughout their management career.
- 5 Practice-Based**  
Not an ordinary academic program, but rather a practice-oriented educational path, based on real case scenarios and tangible skill improvement activities.
- 6 Impactful and Internationally Focused**  
In direct contact with multinational partner companies, we provide young talent with direct contact with the business community, enabling them to grow with an international focus based on global market movements and demand.

# The International Master Experience

Interactive and dynamic classes offered fully on campus in Rome, empowered by career and entrepreneurship services, to prepare students to kick off their careers or accelerate their current one.

A specialized journey, integrated with Business Practice experience, where students put theory into practice.

## 1 Pre-Class

### Prepare to Explore Concepts

- Pre-Master courses
- Read assigned material in Syllabus on Blackboard
- Self-Assessments
- Preliminary research or analysis of business case study or an article, topic orientation
- Usage of EBSCO & Euromonitor

## 2 In-Class

### Learn and Practice Concepts

- Explanation and clarification of concepts and theory
- Quizzes, brainstorming, case studies, role plays, pool surveys, class discussion, team work, students presentations, Q&A, practice lab
- Short exercises, guest lectures
- Getting feedback

## 3 Post-Class

### Evaluate, Apply and Expand your knowledge

- Reflection of the learning experience
- Review difficult concepts, individual study
- Tests, practical assignments
- Blackboard class forum discussion
- Additional reading and resources
- Projects development & team work

# International Master in Data Science

**Francesco Amendola**

Graduated with honors in Electronic Engineering at the University Roma Tre, received his MBA Executive from Link Campus University of Malta. Currently working as ICT Director of ATAC, the largest local public transportation company in Italy, and one of the largest in Europe. He has been CIO (Chief Information Officer) and IT Operations Manager for almost 10 years, in one of the biggest providers of technological solutions for the worldwide gaming market.

Data Science is a multidisciplinary field of study that brings together statistics, logic, programming, business knowledge and cutting-edge technologies (e.g., Artificial Intelligence and Machine Learning, Advanced Analytics, Cloud Computing, etc.) to analyze data, in order to understand actual phenomena and define strategies to increase company profitability and business growth.

This Master is designed to equip students with the right knowledge, competencies, tools and resources to achieve the best results in managing data, including Big Data, extracting value from it and generating useful information and insights. Participants with no background in the field can take 3 introductory courses that will prepare them to enter the world of Data Science.

The Master is divided into 2 areas:

---

Technical skills for data analysis, learning to use different sets of software and analytical tools.

---

Management skills for analyzing, presenting and using data for management strategies and decisions.

---

The knowledge provided will help participants generate powerful predictive models and work with technical and business departments to generate valuable results. This program is a perfect for anybody who wants to become a professional data scientist or business analyst in data-driven companies, focused on achieving business goals through Data Science. Nowadays, there is huge demand around the world for professionals and managers with Data Science competencies, able to work with data to deliver effective solutions, in order to improve business performance, reduce costs or optimize business systems and processes. This Master is a specialized journey, integrating Business Practices and real cases, enabling students to put theory into practice.

# The Master offers

**1** Solid, intensive training to enable students to put into practice all knowledge acquired on their Master experience, growing personally and professionally.

**2**

## Use Data Science Tools and Software like a real Data Scientist

Explore software including Tableau, Power Bi, R, Python, Hadoop, and MongoDB. Practice on Cloud platforms such as Amazon AWS, Google Cloud Platform, and Microsoft Azure.

**3** International Bootcamp in Silicon Valley, Barcelona, Paris, Qatar, Lagos, Rome and Tuscany

Looking for an international experience to gain a brand-new perspective on the business world? We offer the chance to enrich your knowledge of entrepreneurship, innovation and other key topics in the business world by taking part in our International Programs in Silicon Valley, Barcelona, Paris, Qatar, Lagos, Rome and Tuscany, where you can also expand your professional network.

**4**

## Career Acceleration Program

**34% Salary Increase - Design your professional profile**

A tailored Career Acceleration Program specifically designed to shape each student's professional profile to enable them to become a competitive figure in the modern employment market. You will have access to workshops focusing on the latest key topics in relation to job seeking and career networking, individual career guidance meetings, and our exclusive events to ensure the best start or a great boost in your career.

**5**

A Program tailored to the latest employability requirements, built with inputs from CEOs and managers from multinational companies, such as Unilever, Coca-Cola, Procter & Gamble, Sony, Microsoft, Bvlgari, Bayer, Warner Media, Vodafone Italy, Pfizer, Nokia, Sky Italia and many more. All part of Rome Business School's Corporate Advisory Board (CAB).

# Why choose the International Master in Data Science?

The **International Master in Data Science** paves the way to new future opportunities and equips you with tools to build a strong professional profile. Discover your untapped potential and your ability to take on responsibility and drive forward meaningful change. It is time to become a better manager, which you can achieve in the following way:

## Practice Lab

Thanks to our worldwide network of partners, Students immerse into 10 hours of practice lab, where theoretical concepts will be put in practice and learning will come through experience. All labs will be conducted by managers from national and international companies, teaching them how to prepare and present real companies' cases.

### Powered by

\* Company partners are subject to change

## DASCA Accredited The biggest accreditation for Data Science

The Master is accredited by DASCA - Data Science Council of America. This allows students to turn to the DASCA Data Analyst certifications exams to boost their employability and career paths.

## Tableau Certified Data Analysis preparation Gain a powerful certification to boost your professional profile

A Practice Lab on Tableau products and solutions gives the students the basics concepts and knowledge to acquire the Tableau Certified Data Analysis. A Tableau Data Analyst enables stakeholders to make business decisions by understanding the business problem, identifying data to explore for analysis, and delivering actionable insights.

## Pre-Master Courses Acquire all the knowledge to your educational journey

Before the start of the Core modules **students will receive a solid preparation to start the Master and follow with greater understanding the focusing and specializing modules**

As part of the pre-master courses students will attend the following recorded classes: Programming in R & Python (in exclusive for Data Science Students), Statistics, Quantitative Methods, Programming in SQL, Basic Excel: Key Formulas & Functions.

## Career Acceleration Program 97% Placement Rate | Design your professional profile

A tailored Career Acceleration Program specifically designed to shape each student's professional profile to enable them to become a competitive figure in the modern employment market. You will have access to workshops focusing on the latest key topics in relation to job seeking and career networking, individual career guidance meetings, and our exclusive events to ensure the best start or a great boost in your career.

## Practice Oriented Learning Experience A journey to experience Data Science

Students will be doing practical activities such as:

- **Capstone Project**
- **Analysis of real case studies**
- **Practice on real datasets**
- **Work on Python through in class exercises and case studies**
- Get a solid knowledge on **blockchain technology and how to apply it in Data Science**

# International Master in Data Science Objectives

## Developing Management skills and Data Driven Leadership for a Business optimization and Sustainability

### You will learn to:

Make decisions in complex business projects using and managing large-scale data through IT systems and solutions, evaluating all the risks and impacts to the business; Create a data-driven business strategy for business growth and efficacy; Manage people, systems and processes. Develop communication that enables you to present and communicate technical information or results effectively to non-technical audiences. Develop data-driven solutions and strategies for business problems and optimization strategic thinking.

1

## Developing problem solving skills while applying Data Science Tools and Information Technology Solutions

### You will learn how to:

Develop an in-depth understanding of the use and importance of Data Science (statistics, logic, programming, business knowledge and cutting-edge technologies). Apply the most relevant technologies, tools and techniques (e.g., Jupyter, Apache Hadoop, MongoDB, Tableau, MS Power BI, etc.) to gain business insights and solve complex business problems.

2

## Developing technological competences in the area of Data Science

### You will learn how to:

Gain technological competencies and experience by practicing and working with statistical software and programming languages (R, Python, SQL). Gain competencies on the Cloud-based solutions offered by Amazon AWS, Google Cloud Platform and Microsoft Azure. Apply the acquired knowledge with hands-on activities and the Practice Lab. Gain knowledge and prepare yourself for specific Data Science certifications.

3

# Program Outcomes

On completion of the International Master in Data Science, you will be able to:

- Manage and analyze Big Data using technical tools and languages (e.g., R, Python, SQL) and technical knowledge (e.g., Statistics, Quantitative Methods) and produce relevant insights and visually effective reports using analytical solutions (e.g., Microsoft Power BI, Tableau, and Qlik).
- Define data-driven business processes and business strategy and gain awareness of and competence in cutting-edge Data Management technologies (e.g., Artificial Intelligence, Blockchain).
- Gain insight into the legal aspects and implications of Data Management (e.g., intellectual property, privacy, data security and quality).
- Be responsible and innovative leaders in the field of Data Science.

The Master enables you to strengthen your competences, equipping you to take on responsibilities in the Data Science Department of different companies, while also developing your capacities for different professional profiles:

Data Analyst

Data Strategy Consultant

Data Scientist

Data Architect

Statistician

Reporting Analyst

Big Data Analyst

Functional Analyst Consultant

Data Engineer

**Giovanni Vignola**  
ITALY

Functional Analyst  
Consultant at NTT DATA

**NTT DATA**

*"My current path teaches me that it is not too late to change course even when you have already started a different kind of path. What makes the difference is: the desire to prove yourself, determination and looking straight towards the final goal. The lesson I learned? Do not allow yourself to be influenced by the opinions of others, by the fear of not succeeding and by the first difficulties you encounter."*

### Graduation Ceremony

### CAREER IMPACT SERVICES

5 different paths to choose according to your professional experience:

1 Career Starter	2 Career Advancer	3 Career Propeller	4 RBS4Entrepreneurship	5 Independent Employment
------------------	-------------------	--------------------	------------------------	--------------------------

# Data Science Structure

The International Master in Data Science program consists of six main sections:

## Pre-Master courses

A series of classes designed to give you tools and guidance to conduct an effective learning journey. You will gain insight into Accounting, learn the best Time Management strategies, Conduct Effective Meeting, analyze the different types of Research Methods for Business, and explore Quantitative Methods.

### Time Management

The Time Management courses will give you the strategies and techniques you need to make the most of your precious time. This course will help students analyze their own strengths and weaknesses, set their own priorities, manage the expectations of others and become more effective in the workplace.

### More about Research Methods for Business

This course is designed to provide students with the necessary skills and knowledge to establish the information required to tackle an identified research business problem (basic or applied) and, based on this understanding, develop and use an actionable research business proposal.

### Effective Meeting Management

During this course students will learn how to create a solid meeting agenda and everything needed before, during and after a meeting to make the meeting effective. Students will also learn what is the role of the meeting facilitator and the key Facilitator techniques and principles for effective meeting management.

### Basic Excel: Key Formulas & Functions

This course presents most commonly used analytical tools of Microsoft Excel. Students will learn how to use lookup tables, data tables, basic modeling, text based list applications and tricks and tips. After viewing students should feel prepared to tackle more complex quantitative analysis.

**Part 1:** Setting up basic analyses

**Part 2:** Lookup tables, data tables

**Part 3:** Logic and if statements (if, if+and, nested if)

**Part 4:** Text based list applications (for list management) including pivot table, macros, named ranges, transposing

### Programming in R & Python

Exclusive for Data Science Students

In this pre course, students will learn the basics of programming in the R - set up environment, get an introduction to the R language, learn the first steps with R, and perform a simple exercise with R.

They will also learn how to set up the Python environment (Anaconda, Jupyter, etc.) They will get an introduction to the Python language, learn the first steps with Python and do a simple exercise with Python.

2

Pre-Master	First semester	T1 Second semester Challenge	T2 Second semester Global Experience
------------	----------------	------------------------------------	--

### Statistics

This module covers the fundamentals of managerial statistics. Topics include descriptive statistics, probability distributions, sampling, estimation, hypothesis testing, regression, and correlation analysis. Statistical software is used to assist in the analysis of these problems. The purpose of this course is to provide students with the statistical tools needed by managers. The course emphasizes understanding the process associated with statistical decisions, defining and formulating problems, analyzing the data, and using the results in decision-making. After attending the lecture and studying, students should be able to: demonstrate an understanding of statistical thinking and data analysis techniques for decision-making, apply statistical techniques to data sets and correctly interpret the results, analyze and apply computer-generated statistical output to solve problems, sample more effectively and accurately, utilize regression analysis successfully and demonstrate an ability to use Excel-based statistical software.

### Programming in SQL

Exclusive for Data Science Students

The goal of this course is to provide students with basic knowledge about databases, with a focus on relational databases and SQL as a language to manage information. Students will be able to create a whole database and operate basic SQL scripts to manipulate data through a DBMS. At the end of this course, students should be able to: define what a database is and define the main differences between relational and NoSQL databases, define the main differences between a DB and a DBMS and write simple queries to create, read, update and delete DB objects, define and create

relationships between tables by using primary and foreign keys, joins two or more tables, create and use stored procedures, scalar functions and table functions, use scalar and aggregate functions

### Quantitative Methods

This course will teach students how to demonstrate statistical thinking and data analysis techniques for decision-making under uncertainty, and how to apply statistical techniques to data sets and correctly interpret results. This course will also teach students how to analyse and apply computer-generated statistical outputs to solve problems, how to sample more effectively and accurately, and how to successfully apply regression sample more effectively and accurately regression sample and how to successfully apply regression sample more effectively and accurately. After attending class and studying, students will be able to: demonstrate proficiency in the use of Excel-based statistical software; show well-developed skills in the use of quantitative techniques for decision-making; formulate and effectively communicate to a business and wider audience, and feasible recommendations developed using the quantitative methods covered in the course; develop useful cap capability plans; rate the efficiency actions.

## Start with the Management Core

### Project & Operations Management

New methodologies and approaches to Project Management (PM) and Operations have been developed in recent years. Whichever method and approach we consider, the ability to put it into practice is based on a solid foundation of key concepts and tools of PM and Operations. This module aims to provide participants with those concepts and tools while both covering the basics of traditional PM and familiarizing students with the latest approaches to PM and Operations. After attending the lectures and studying, students should be able to use their knowledge to manage projects and operations, understand the importance of aligning PM practices with a firm's strategy, critically examine PM information and data to make critical decisions and carry out analysis, examine the types of transformation processes occurring within operations and define the roles and responsibilities of Operations Managers and the challenges they face.

### Managerial Economics

Managerial Economics primarily focuses on the analysis and techniques involved in allocating scarce resources to satisfying multiple needs. Since resources are scarce in relation to mankind's needs and wants, they have to be utilized intelligently to produce the maximum possible benefit, whether it be for consumers or institutions ranging from governments, firms, hospitals and universities to religious organizations. The topics covered include the economic problem, the scarcity-choice dilemma, economic theory and models, macroeconomic and microeconomic perspectives, and GDP. After attending the lectures and studying, students should be able to recognize the distinction

between microeconomics and macroeconomics, understand the concepts of opportunity cost and comparative advantage, understand the law of supply and demand, apply consumer and business decision-making, and use marginal analysis to assess a firm's behavior in the different market structures of perfect competition, monopoly, monopolistic competition and oligopoly.

### Business Strategy

This module focuses on the integration and coordination of the functional areas within a company. Students will gain a clear understanding of the long-term direction and strategy of a firm, its values, competitive advantages and capabilities, as well as the areas of potential growth and success. This module also gives a clear overview of the different business growth strategies, and students will learn the meaning of a strategic management cycle and acquire all the tools and essential knowledge to be able to make business decisions. After attending the lectures and studying, students should be able to identify strategic business units (SBUs) in organizations, assess business strategy in terms of the generic strategies of cost leadership, and assess the benefits of cooperation in business strategy.

### Accounting & Budgeting

A carefully constructed budget allows a business to continually monitor where they are financially. This allows for strategic, long-term planning for everything from current operating costs to potential expansion. Knowing the budget gives the ability to hire new employees, invest in new products/services and set new goals in line with the organizations' corporate financial objectives. This module will define key terms such as ROI, EBIT, and GAAP. It will also provide an understanding of financial statements, budgets,

forecasting techniques, purchasing decisions, and laws that regulate the handling and dissemination of financial information. After attending the lectures and studying, students should be able to understand, analyze and interpret budgets and carry out forecasting, understand financial statements, understand and apply double-entry accounting, and make smart purchasing business decisions.

### Marketing: Traditional and Digital

This module combines traditional and digital marketing. It introduces principles and problems of the marketing products and services that are essential for every manager to know. The topics include promotion, placement, integrated marketing communication and pricing strategies for products. On completion of the course, students should be able to apply marketing principles in organizational decision-making. The digital marketing section of this module focuses on the techniques and tools required to reach customers through digital channels, such as email, social media, and so on. The ability to create an advertising strategy for promoting products, services and goods and communicating their values through any digital medium will also be covered on this course.

### Entrepreneurship and Business Planning

This module focuses on understanding how entrepreneurs create economic and social value by tapping into new opportunities. In addition, the module explores entrepreneurial approaches that corporate managers can adopt in response to complex problems and emerging opportunities. In this module, participants will critically discuss innovation versus invention, describe innovation as incremental change, and understand the importance of continuing entrepreneurial personal development. After attending the lectures and studying, students should be

able to demonstrate a clear understanding of a business plan, how it is structured and how it must address the needs of differing targets, demonstrate the ability to design and produce a detailed written business plan, critically discuss innovation versus invention, understand creativity and articulate the links between thinking, problem-solving and business challenges.

### Human Resource Management

The module focuses on the fundamental theoretical and practical issues in the field of human resources management. It focuses on strategic HR issues such as acquiring, developing, motivating, managing and retaining a workforce. Special emphasis is placed on ensuring consistency and alignment with the firm's strategy and on adding value and competitive advantage through HRM. After attending the lecture and studying, students should be able to: make decisions connected to Human resource management, understand the importance of aligning HRM practices with a firm's strategy, critically examine various HRM practices and develop a personal philosophy of human resources management that will enable one to perform effectively as a manager.

3

## International Master in Data Science Core Program

### Software that will be used during the Program

**Languages:** R, Python with packages and libraries for Data Science (i.e. Tensorflow, Pytorch, SciKit-Learn)

**Environments:** Anaconda, Jupiter

**Database:** SQL and NoSQL (MongoDB)

**Tools:** Apache Hadoop, Hive, Impala and Spark

**Analytics:** Tableau Desktop, Microsoft Power BI Desktop and Power BI Report Builder

**Cloud platforms:** Amazon AWS, Google Cloud Platform, Microsoft Azure”

The driving force of the Master, the major content of the path that you have chosen to take. You will cover the latest insights into international management, learning the most advanced aspects of:

#### Data-driven Business Strategy

This module focuses on the basic concepts and fundamentals of Data Science, in order to understand the specific terms and concepts (e.g., Big Data, Analytics, Data Warehouse and Data Lake, Data

Mining, Artificial Intelligence, Machine Learning, etc.). The module examines Digital Transformation and how Data Science technologies can affect Digital Businesses and Business Management, as well as the Data Culture required to become a data-driven company and the competitive advantage coming from the Customer Insights.

#### Data Science Languages

This module mainly focuses on R and Python, the most widely used programming languages for working with Data, in order to extract valuable information from it. The module also covers packages and libraries especially designed or adopted for Data Science (e.g., Tensorflow, Pytorch, SciKit-Learn) and the environments in which to execute them (e.g., Anaconda, Jupyter Notebook). Students will not only learn the theory, but also take part in many practical activities and hands-on exercises with real datasets to learn use these tools effectively.

#### Data Science Tools and Toolkits

This module focuses on the most popular technical tools, software, and toolkits used in Data Science for managing Big Data. It covers topics such as NoSQL technologies, with a particular focus on MongoDB, as well as concepts such as Distributed Computing Architectures, describing their pros and cons, and the latest frameworks and technologies for managing very large datasets in distributed environments, such as Apache Hadoop, Hive, Impala and Spark.

#### Artificial Intelligence and Machine Learning

This module focuses on the results that can be achieved in data analysis by applying the most innovative technologies and

solutions based on Artificial Intelligence engines and Machine Learning techniques. In particular, it covers topics such as Data Mining; Machine Learning algorithms, including Deep Learning; Advanced and Predictive Analytics solutions; Natural Language Processing (NLP) techniques for analysis of natural languages; Cloud solutions and services offered by the most widely used platforms: Amazon AWS, Google Cloud Platform, and Microsoft Azure.

#### Data Presentation, Communication and Evaluation

This module focuses on Data Presentation techniques, the best ways to effectively evaluate and communicate technical information or results, even to non-technical audiences. After attending the lectures and studying, students will be able to present data and information using the most advanced Visual Analytics tools available on the market (e.g., Microsoft Power BI and Tableau), analyze and evaluate the results, produce outstanding reports and dashboards, to support business and management decisions.

#### Data Governance

This module focuses on the processes and methodologies required for properly managing data in an effective and structured way. It covers the most important aspects of Data Quality, including the Data Cleaning/Cleansing processes; Data Ethics, including topics such as the Intellectual Property, Privacy and Personal Data Protection, Data Security; Data Certification, including one of the most interesting and promising technologies for building effective solutions: blockchain. Moreover, the Agile Scrum Framework is examined give students insight into the concepts and the main elements of one of the most popular and widely used methodologies nowadays for managing projects.

4

Pre-Master	First semester	T1 Second semester Challenge	T2 Second semester Global Experience
------------	----------------	------------------------------------	--

## Company Visits

As part of your learning journey, the company visits in Rome included in the program will give you the opportunity to meet professionals and gain insights into the operations of various companies in different Italian and international markets.

### The Purpose:

Students gain insights into how various companies operate in different markets.

### What students do during a company visits?

During a company visits, students get the chance to network with a company manager who presents the company, get into the company's business reality and learn how they run their business in a specific industry.

At the company visits students can ask questions to the manager and learn how the concepts they learn, companies actually implement.

- President Technology Consulting EMEA South & Italy Consulting Country Leader, Oracle
- Chief Information Officer, BNL BNP Paribas
- Industry Executive K12, MICROSOFT
- Computer Security Specialist, TIM
- Country Leader Italy, Tableau Software

5

## Practice LAB

### What is the Practice lab?

Students spend 10 hours immersed in the Practice Lab, where theoretical concepts are put in practice and participants learn through experience. The Lab is run by managers from leading national or international companies in the sector/ industry, who will examine different specialist knowledge, work on exercises and network, while sharing their experience and expertise with the students. The Lab is entirely run by the School’s Partner Companies and the activities included are specific for each Master program and goal.

### Powered by

Tableau Software is an American interactive data visualization software company focused on business intelligence. It was founded in 2003 in Mountain View, California, and is currently headquartered in Seattle, Washington.

*\* The Partner Company and the hands-on class activities are subject to change*

The Practice lab is consisted of 3 main phases:

### Phase 1 | Managers Meet-Ups

Students meet 2 managers of the company partner, from different areas, or company’s divisions, for example from finance and marketing department, that share their experience on daily bases on how they conduct their business, specific and relevant for the master.

### Phase 2 | Hands-on Class

Students are engaged in direct experience by the company’s managers, to enhance the knowledge and the skills set developed in the master. They will analyze, assess, create, develop, a certain plan, strategy given by the company, connected to what they’ve studied in class and the company’s business operations.

### Phase 3 | Get on Task

The company’s managers give 2 in class business scenarios (business cases) to students, so that students by implementing the concepts learned, find solutions and create strategies. At the end of the class, they present verbally the final results and ideas.

## Learning Outcomes

1 Get from theory into practice guided by an industry company

2 Understand a business reality and learn from industry companies’ best practices

3 Communicate & Network with Industry managers.

4 Professional development

6

## Leadership Program

### What is about?

Soft skills are personal attributes that can affect relationships, communication, and interaction with others which are crucial for business success and effective leadership, in this high tech world and digital transformation in which we live. All the new technology and innovation cannot be applied without a proper leadership skill. The Leadership Program is a path that will lead towards self-discovery, empowerment and reinvention to become the leader of the future. The program is practice based, consisted of 5 interactive courses, including a self-assessment test, role plays and quizzes.

### Communication & Persuasion in the Digital Age

To be a successful leader in the world of today, we must be able to effectively persuade and influence at all levels, in every content (virtual and in person). This course will help students become self-confident communicators in person and within a virtual context: from online presentations to social media. They will learn the tools for engaging and communicating with the audience at all levels.

### Team Work Effectiveness

Students will learn how to create effective teams, how to optimize their groups and design a team for success. They will learn the model of high performing team and in a practical way practice team work and discover the characteristics and benefits of mutual collaboration for goal achievement. Topics in the course also include: Team formation and development, building, leading, organizing, and motivating teams, Managing conflict in groups.

### Agile Leadership

Agile leadership is the ability to lead in a wide range of circumstances, particularly new, changing and uncertain situations. Students will assess their leadership style through the prism of established leadership models and acquire agile tools and the values of an agile leader by exploring different models of agile leadership to create agile teams and lead in times of uncertainty in order to increase business value.

### Scenario & Forecasting

The Scenarios and Forecasting course is designed to introduce students and future managers to a planning method that can open their eyes to futures changes and opportunities that might materialize, help them maximize their flexibility so they can compete effectively in different landscapes that may emerge, and prepare them not just for the future, but for several possible futures.

### Emotional Intelligence

On this course, students will learn skills to interpret and manage their emotions and balance their optimism and pessimism, using coping methods and relaxation techniques. Students will become more aware of their own thoughts and emotions and, as a result, their ability to interact calmly with others in every context of life will improve.

**Be empowered and self-aware, always  
reinvent yourself and keep on discovering  
your infinite potential.**

Rome Business School, Leadership  
Program 2023

# Electives

Choose 1 of 15:

Elective courses enable you to personalize your Master and build a study program that has the scope to aligned new disciplines with your professional interests and goals.

They allow you to explore other areas of knowledge and to connect them to your Master path, doubling your opportunities of networking and expanding your professional horizons.

Pre-Master	First semester	T1 Second semester Challenge	T2 Second semester Global Experience
------------	----------------	------------------------------------	--

## Innovation & Growth

### 1. Customer Experience Innovation

This course teaches students to develop and execute a customer experience strategy that will drive customer growth, profitability and loyalty. It also provides an outline of customer experience tools and techniques. Students will also understand the differences between customer service and customer experience.

### 2. Design Thinking, Imagination and Creativity in Business

Design thinking is the process for creative problem-solving. On this course, students will learn to solve problems creatively in a business setting, applying design thinking methods by prioritizing the consumer's needs above everything else.

### 3. Growth Strategy

This course teaches students how to develop and execute a business growth strategy. A growth strategy is an organization's plan for overcoming current and future challenges to realize its goals for expansion. Examples of growth strategy goals include increasing market share and revenue, acquiring assets, and improving the organization's products or service.

### 4. Scaling Projects and Organizations

Scaling projects serves as a great model for organizational growth when it comes to inputs, outputs, process, teams, and more. This course is based on the premise that scaling is a crucial skill for building vibrant and enduring organizations from small startups to large enterprises. You will learn best practices and principles for scaling excellence and hear from industry leaders who have applied these principles successfully.

### 5. Agile Project Management: Creating Innovative Products

The course teaches the concept of agile project management. Students will learn to adapt quickly to changing requirements and produce higher-quality products or services to better satisfy the customers' needs. They will learn the iterative approach to managing projects, with a focus on working in small batches and with a collaborative approach to the customer. Students will understand the agile revolution's impact on innovative product development.

## Tech & Digitalization

### 1. Corporate Fintech & Blockchain

Students will get an overview of the most recent technological advances that are radically changing the financial services industry and will learn how corporations create value and build a competitive advantage and how fintech firms navigate the complex regulatory environment.

### 2. Tech – ICT

Students will dive into Tech-ICT industry and will learn and analyze how the tech and ICT has brought about changes in a selection of jobs and different benefits. Students will understand key technologies driving modern businesses and the concepts around Cloud, Data and AI, and related important buzzwords in the Tech world.

### 3. Development Tools for Web and Mobile Apps

An introduction to mobile application development using tools and scripting languages rather than object-oriented programming languages. This course assumes students already understand how to develop and deploy web sites with HTML5, CSS3 and JavaScript. Topics include a comparison of native, hybrid and web based mobile technologies.

### 4. Big Data & Analytics in Business

This course will provide students the core knowledge about big data, business data, and analytics in business. Students will learn how to generate business value from new technologies to their own companies. They will be able to create a business analytics report and analyze business data sets to generate facts, valuable outcomes and sustainable impacts.

## Industry-focused

### 1. Fashion & Luxury Management

Students will get an in-depth overview of the Fashion and Luxury industry and learn how fashion and luxury companies work, gaining an understanding of their brands, products, retail, and communication strategies and channels. Students will also analyze business models, international development, and product categories of different fashion and luxury companies.

### 2. Circular Economy, Sustainability and Business Opportunities

A circular economy is an economic system aimed at eliminating waste and the continual use of resources. Students will learn to manage the resources of a business better and how to explore and run sustainable business opportunities by considering economic, supply chain, social, technical, and environmental aspects.

### 3. Brain Pleasing - Neuromarketing

This course will introduce students to the multidisciplinary field of consumer neuroscience and neuromarketing. It will start by introducing the core concepts of the human brain, the elements of the consumer mind, and how its insights can be applied in commercial and societal understanding of consumer behavior.

## International Business

### 1. Doing Business in China

This course will guide students in doing business in China. Students will learn how to approach the Chinese market and think from Chinese perspective, analyzing the Chinese market, supply chain management, cultural diversity, business processes, consumer behavior, and as well the Chinese contract law.

### 2. Doing Business in Europe

This course will give students guidance for doing business in Europe. Students will learn to approach the European market and think from a European perspective, analyzing the European market, supply chain management, cultural diversity, business processes, and consumer behavior, as well as European contract law.

### 3. Doing Business in North Africa & Middle East

This course will guide students in doing business in North Africa and Middle East. Students will learn how to approach these markets, analyzing these markets, the supply chain management, cultural diversity, business processes, consumer behavior, and as well the north African and middle east contract law.

# International Master in Data Science - Capstone Project

At the end of your educational experience, you will have the chance to prove your abilities by tackling a real business challenge. Use your talent to identify opportunities and create a truly innovative strategy.

## Your own real Data Science Project

You can make the difference! Show your potential and put the knowledge acquired on your educational journey into practice.

Be a company leader and choose from two main options for your final project:

## Business Challenge

Work on one of two real Business Challenges of a specific company. Choose between a Business Plan and a Data Science plan.

### Structure

To create your final project, follow the Ready, Set, Go Structure:

#### Ready

Stage 1: Team Creation

Stage 2: Capstone Project - Kick Off

#### Set

Stage 3: Empowering Mentoring sessions with the Program Director

Stage 4: Capstone Project Proposal submission

Stage 5: Capstone Project Mentor appointed

#### Go

Stage 6: Knowledge in Action & Individual Mentoring to each team with the Capstone Project Mentor

Stage 7: Capstone Project Submission

Stage 8: Capstone Project Presentation to the Capstone Evaluation Committee

## Your Practical Challenge

### Previous years experiences

Tackle a real company challenge. You can choose to be part of a small team and design an innovative business plan or define a revolutionary Marketing strategy in line with the trends and challenges of the today's global industry.

**The Practical Challenge:** Industry Transformation with Data Insights; An overview role of Data and Insights in different industries. Company: Tableau

**The Practical Challenge:** Improve BNL Customer Mobility. Company: BNL Gruppo Paribas.

## Capstone Project presentation and Grading

You will present your Capstone Project to the Academic Committee composed of the Master's Program Director, and (if any) a select group of industry experts and managers. The project will be evaluated in terms of content, originality, and presentation plus a bonus for an excellent teamwork activity.

## The Evaluation Committee

The Capstone Evaluation Committee is composed of:

The Program Director

The Capstone Project Mentor

Company Manager of the partner company (if applicable)

If students work on their own challenges, the committee is formed of:

The Program Director

The Capstone Project Mentor

The Capstone Project Mentor of other teams with expertise in the field relevant to the project

## The Project Presentation

Upon completion and submission of the final Capstone teamwork projects, all teams verbally explain the assignment (each member takes the floor) in front of the Capstone Project Evaluation Committee. Students can choose to illustrate their project online or on-campus; each presentation takes thirty minutes.

### Assessment:

Written report evaluation grade by the Capstone Project Mentor (team grade)

Verbal presentation grade by the Evaluation Committee (individual grade)

### Final Grade

An average of Written report and Verbal presentation

- 1

**Capstone Project Kick Off**

3h of Intro to Capstone Project by the Program Director, scope, attempts timetable, purpose, objectives.
- 2

**Team Creation**

Min 3 people / Max 5 people
- 3

**Capstone Project Proposal: Submission on BlackBoard**

3h of Capstone Proposal Discussion with the Program Director. Q&A and feedback.

- 4

**Program Director Mentorship**

The Program Director based on the Capstone proposal assigns on BlackBoard the Capstone Project Mentor to each team (The Mentor is a professor from any master with the expertise in the field) 3h of Q&A and feedback with the Program Director.
- 5

**Knowledge in action**

10 hours of mentoring sessions for each team with the Capstone Project Mentor (online live + written qualitative feedback via email).

- 6

**Project Submission on BB**

Evaluation of the Written Report by the Capstone Project Mentor and approval for verbal presentation to the Capstone Evaluation Committee.

- 7

**Capstone Project Presentation**

Verbal Capstone Presentation 30 min per team including Q&A. Teams present in front of the committee composed of:

Program Director  
Capstone Project Mentor  
Company Manager (if applicable)  
or another Capstone Project Mentor of other teams who has the expertise in the area
- 8

**Evaluation**

Individual grade to each team member
- 9

**Final committee decision and Final Grade**

# Rome Business School International Bootcamps experiences

Hone your entrepreneurial skills and test them with the ultimate challenge: Rome Business School's exclusive Bootcamps in Silicon Valley, Paris (in partnership with SUP DE LUXE PARIS), Rome, Barcelona (in partnership with EAE Business School) and in Tuscany (in partnership with Castle Volognano), five beautiful cities at the forefront of innovation and among the most productive startup ecosystems. Take an advanced international program designed to put you in realistic business scenarios to solve and provide you with a practical way of learning and skills development, all with the professional support of tutors from top-class companies!

During the full week you will experience an intensive and fully immersive business experience, facing challenges, dealing with managers, students and lecturers, and creating your own project that will be presented at the end of the Bootcamp Experience.

Pre-Master	First semester	T1 Second semester Challenge	T2 Second semester Global Experience
------------	----------------	------------------------------------	--

## Why Silicon Valley Bootcamp

Change your life forever: discover where the World Technology was born and grown. From microprocessors to computers, from browser to social media, from sharing economy to crypto currencies.

### Silicon Valley Bootcamp

*"The Silicon Valley Bootcamp has been an incredible opportunity to meet so many smart, talented and kind people. Both the dynamics in our group – bouncing ideas, pitching to each other project, and also the talks by experienced valley brains would remain a great memory and a foundation for future endeavors".*

Alexandrina Pankovska | International MBA

## Why Paris Bootcamp

The challenge is how to combine creation and management in a luxury house as in all types of companies.

### Paris Bootcamp

*"Thanks to the bootcamp I had access to exclusive places that I could not have visited as a tourist. One of the most interesting things is that I got a chance to observe how my colleagues, from different nationalities perceive luxury, and so now my mind is more open about it".*

Mayra Rada | International Master in Fashion Management

## Why Barcelona Bootcamp

Develop a completely new business idea through the Google Ventures Methodology: The Design Sprint. How innovation and entrepreneurship are leading the change of the global market.

### Barcelona

*"It has been a very enriching experience, we've learned a lot we've gone from the theory part to actually work on teams and coming up with a solution to a problem that was presented to us. It has been a great experience to work with different people, get to know new people you don't usually know at school, working with people from different background and cultures, get to know different ideas, listen to each other and arrive to a good solution at the end with everyone's input".*

Fernanda Cantu Llantada | Global Master in Marketing & Sales

## Why Rome Bootcamp

The aim is to mix together contents and network to become leaders in the strategy of your current or future company.

### Rome Bootcamp

*"I decided to come as I want to progress my career into leadership so that's why I decided to come. So, there's been lots of teamworking skills happening here, which is really great to take into any role you're going to go in the future. Also, my particular favorite so far has been the corporate social responsibility. I work in social media, so that's something that's really important for my job role and any job roles that I will have in the future as well. Meeting new people, seeing new sights. It's been a great experience".*

**Lucie Simon** | Master in Digital Marketing at Tesside University

## Why Tuscany Bootcamp

Experience Italy through a native person's perspective by a cultural exploration and understanding of not only the process of winemaking, but mostly the convivial importance of food and wine.

### Tuscany

*"I am overwhelmed by how much I'm learning and my mind is expanding. Not just from the technical aspects of how how different wines are made and processed, and what a consortium does, but also listening to other students' (from different parts of the world) perspectives on food, beverage and culture and what brings them to Tuscany".*

**Ching-Mei Chen** | International Master in Tourism and Hospitality Management

## Why Doha Bootcamp

Discover and develop unique opportunities to grow in a dynamic environment with a traditional yet modern approach to business.

## Why Lagos Bootcamp

Don't miss the opportunity to learn how to do business, generate growth as a socially responsible leader and discover the giant of Africa.

# 03 \_\_\_\_\_ Your Professors

# An International Leading Team

The students will be guided by experts throughout every step of the International Master in Data Science.

Your progress along your professional path will be guided and steered by an ever-growing number of professionals, including high-level managers of the Corporate Advisory Board and an extensive team of international academic professionals.

## Corporate Advisory Board

The Corporate Advisory Board embodies the spirit of collaboration between the academic world and the real management sphere by becoming one of the key players in the Quality Assurance Process, the process of continuous improvement of the Rome Business School's range of Management Training programs.

Composed of **91 Leaders, Managers and Professionals** from key areas of National and International Businesses, through the Corporate Advisory Board, Rome Business School activates a process of continuously updating its training programs, relying on numerous business interactions and inputs provided by the members of the committee in the annual meetings and discussions with the school.

**Umberto Galimberti** | Italian philosopher  
CAB Day 2022 Speech

## The Advisory Board Method

**Guide the Business School in defining the best strategy** in order to ensure continuous improvement in the quality and innovation of management training.

**Improve the training offer** of managerial training programs based on the real needs of the labor market.

**Collaborate with representatives of major multinational and national companies** for synergies of great value both for the academic world and for the corporate world. By promoting research and business with the support of professionals from different companies, the Advisory Board promotes the research and analysis of key business processes such as: Finance, Logistics, Marketing, Sales, Communication, Human Resources, Management Strategy and Project Management.

**Having representatives of leading companies** in the market who guide and support RBS and allow the school to improve the key skills and knowledge of the training offers proposed by RBS.

# Career Services

Define your career path, develop a strategy, hone your self-presentation skills, and sharpen your CV.

Access exclusive online tools including a job portal, expert mentoring, consulting training, career targeting, and presence optimization. We provide everything you need to fulfil your aspirations, helping you make the most of your knowledge and unique capabilities. We strive to give a hands-on focus to every one of our courses, not only by teaching, but also guiding, counseling and providing real, tangible and useful knowledge, that can be readily applied to the business world.

## Create your own way through our Career Services

The future is in your hands. Use your passions as a starting point and carve out your own path. Throughout your International Master in Data Science, you will be accompanied and supported by our Career Services team. With over 10 years' experience in education, we help young talents to build their future, guiding them along the path that best suits their capabilities, desires and professional goals. In addition, we have structured an internal Corporate Advisory Board to make contact with managers from leading companies and build the perfect network solution for our students' placement.

Our Career Service programs are divided into two core areas:

### Occupational Pathways

- Career Starter
- Career Advancer
- Career Propeller

### Entrepreneurial Pathways

- RBS4Entrepreneurship
- Independent Employment | GIG Economy

When we think of careers, we think of distances, goals, and achievers. Those who go the distance to reach a goal, the goal they set for themselves, and thus become the creators of their own success.

Crossing a finish line requires perseverance, effort, commitment and a team to accompany you along the way. Your professional career is not a race for time, it is a long process and for life that requires dedication, support and enthusiasm.

At **Rome Business School**, we accompany you on the path you choose to take in your professional career. Together with you, we analyze your objectives in order to develop the route that will lead you to achieve them. We accompany you, we motivate and provide the tools to make your journey go as far as you can dream. Together we will form the team that will take you to cross as many finish lines as you draw for yourself.

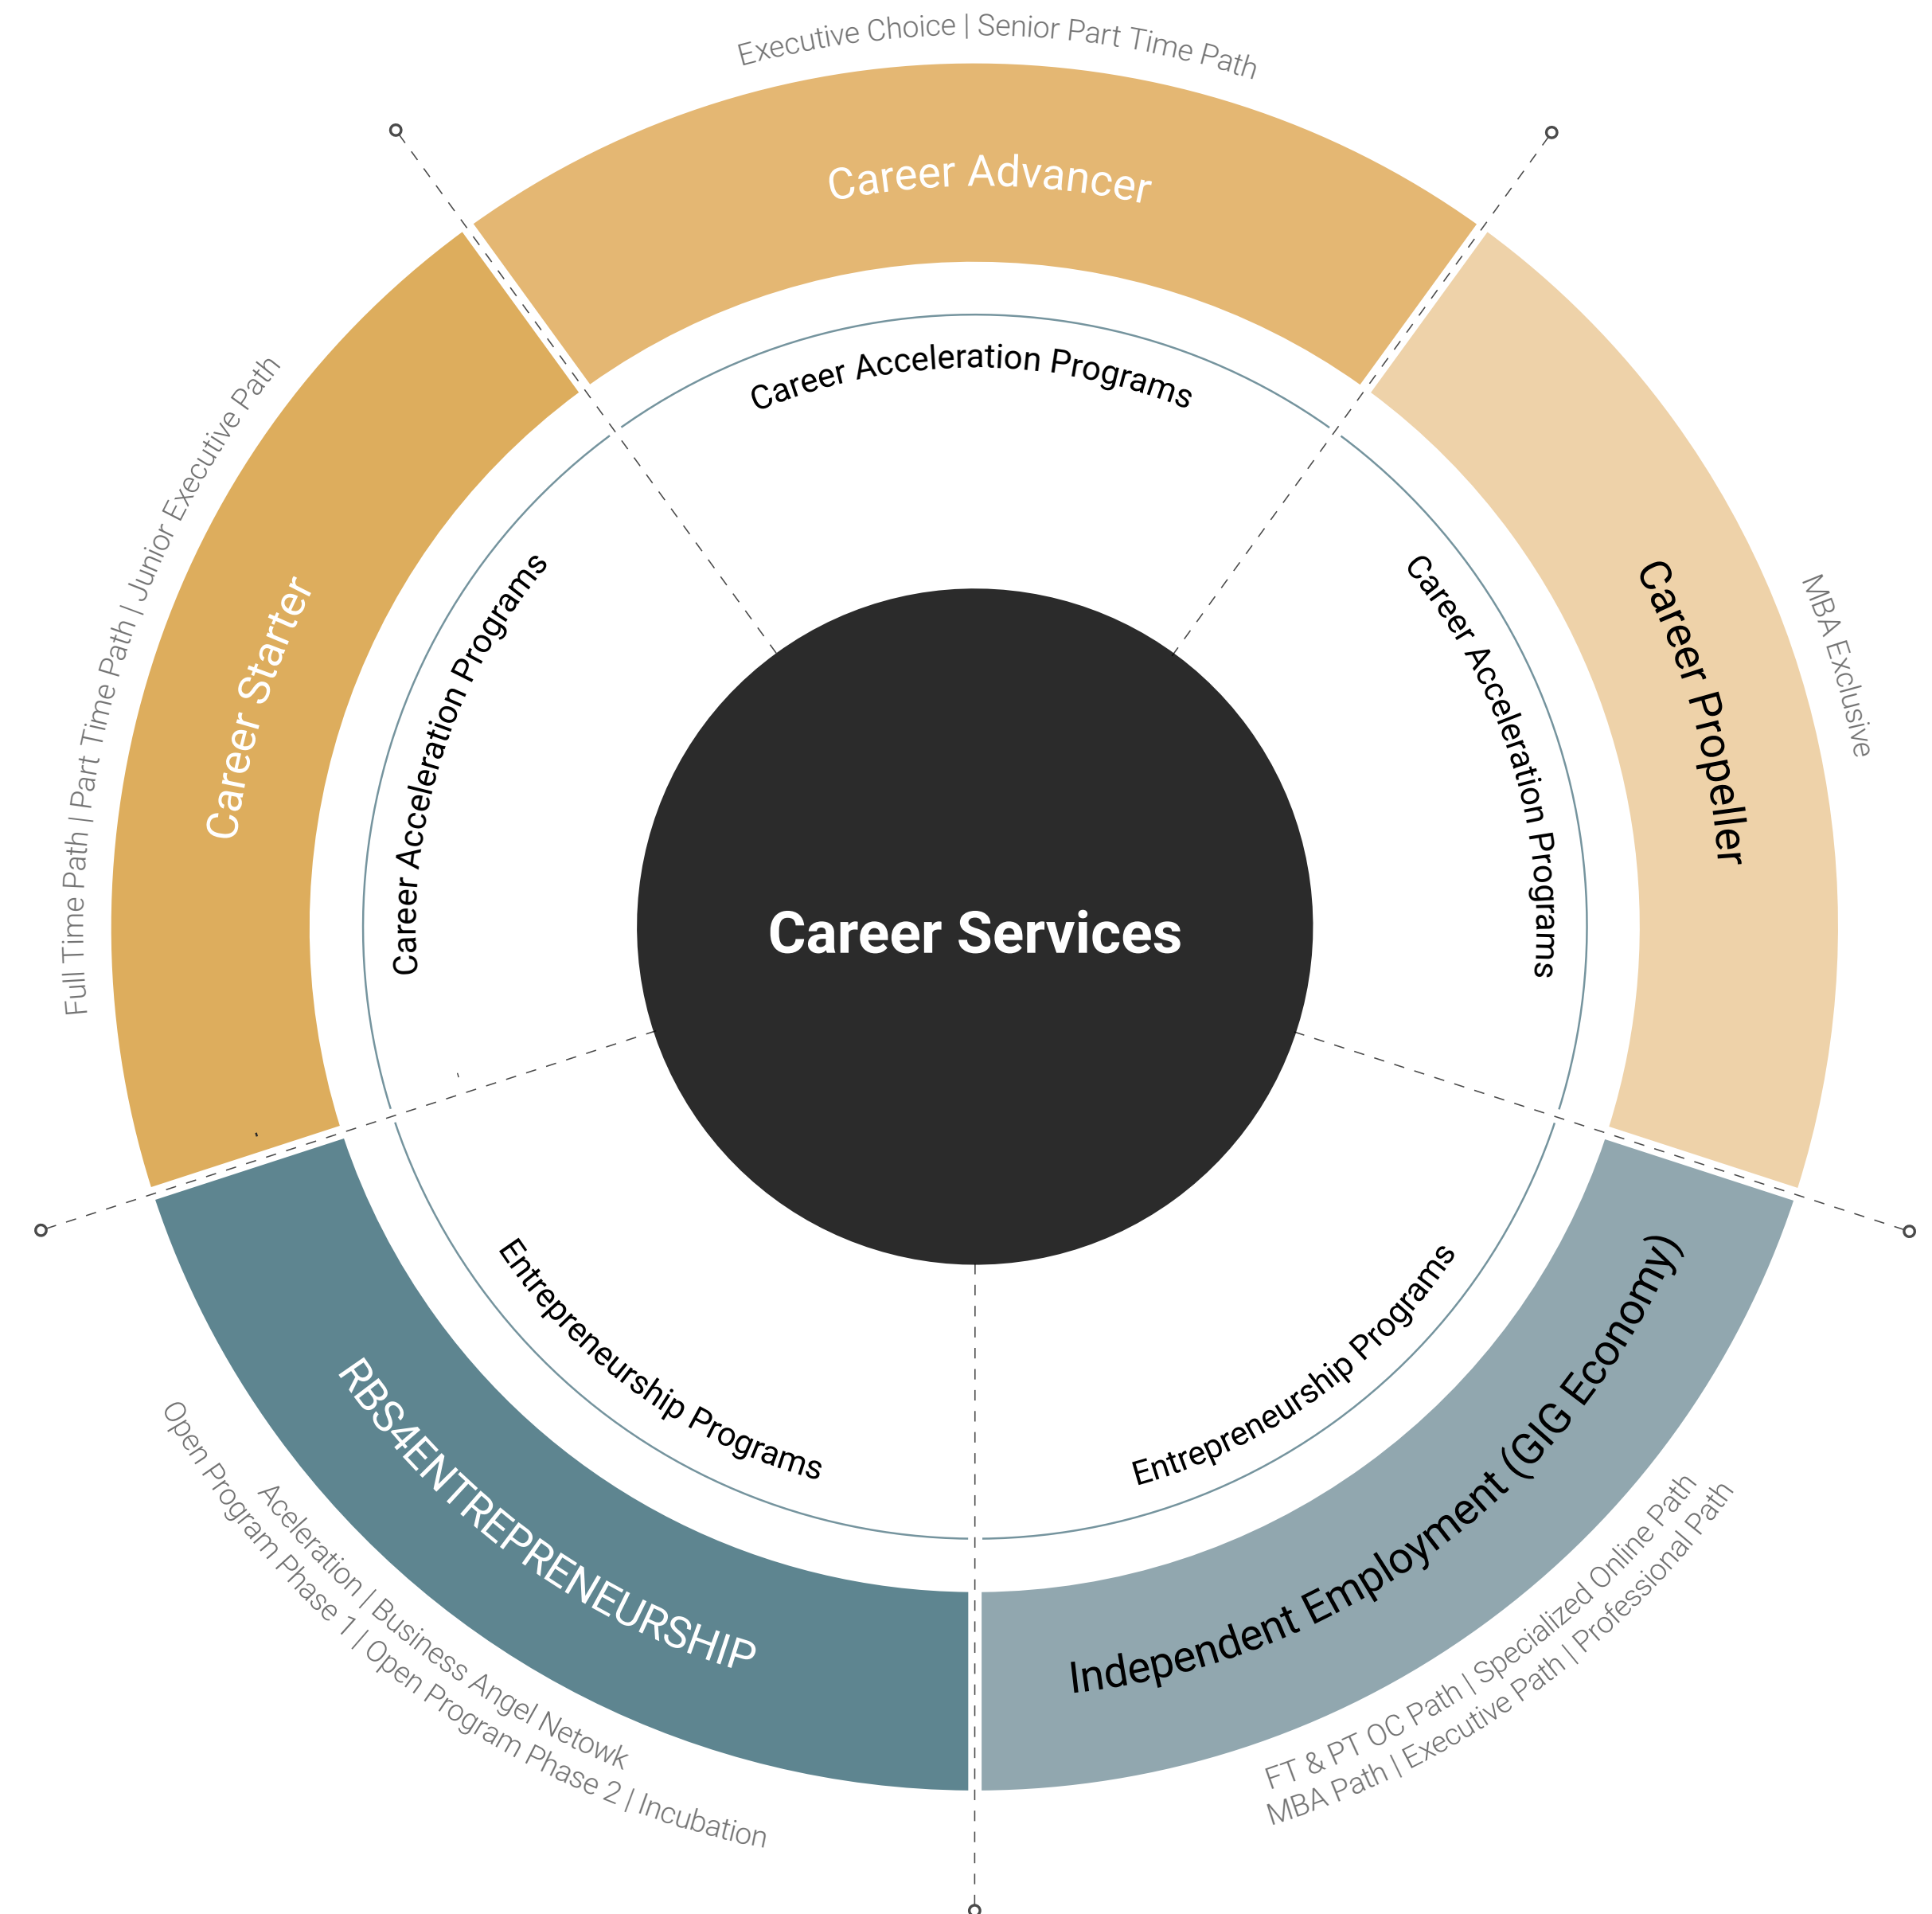

### How do we do it?

Professional processes are not one-size-fits-all. For this reason, we have designed several routes for different professional moments.

Through a detailed analysis of your background and your future prospects, we will help you choose the route that best suits you and you will have a team of specialized professionals to advise you throughout the whole process.

the journey. Our advisors will give you the tools you need to reach your full potential and achieve the professional advancement you are looking for.

Each route can be personalized to design a unique learning path, like your fingerprint. Because your future is yours alone and you are the one who sets the destination.

# Occupational Pathways

1

## Career Starter

This route is for students that are looking for:

Entry into the labor market

---

New job opportunities

---

Development of specific competences

---

Improving key skills

---

Networking

---

The path is designed for young professionals who, despite having achieved their first objectives and degree, look ahead and face new challenges, searching their first job position and with which to test their talents and knowledge.

Throughout this pathway students will delve into subjects and skills development that may be useful and necessary both in their current pathway and in the future.

Students will be guided and reach their objectives thanks their personal effort, the advice of our team of professionals and the other students themselves who are competing to reach the same goal.

Together they will be able to create a networking bubble that will help them get there.

2

## Career Advancer

This route is for students that are looking for:

Professional improvement; promotion and/or increased responsibility

---

Development of specific competences

---

Improving key skills for current role

---

Networking

---

This is the route for those who are not waiting for the moment, but go looking for their own opportunity. A path for proactive professionals who know that their progress depends on their attitude and want to feel ready for new challenges, either by enhancing the trajectory they have they have built up to now or through a change in their profession.

The team assigned to walk this pathway will analyze the student's current career to determine what knowledge and skills and competencies will be key to key to take advantage of this opportunity.

In addition, they will guide the learner to focus their potential in a role or sector in which they can to achieve professional success.

3

## Career Propeller

This route is for MBA students that are looking for:

Develop specific competencies

---

Improve key skills for your current role

---

Foster synergies in your work teams

---

Foster organizational culture

---

Innovate within your organization and implement disruptive work methodologies

---

This is a road to the TOP!

The definitive step a professional career with which students will become a responsible leader. This is a more specialized route for those who want to follow the more ambitious path and feel ready to take it.

Our team will help students develop the specific skills to generate the positive and transformative impact that the business world needs.

In this way, students will learn how to shape their entrepreneurial organism and to configure and lead their own team, fostering synergies between each member of the team in order to get the most out of their talent.

## Career Acceleration Program

The Career Acceleration Program will help you develop the knowledge, market insights and tools that you need to pursue a successful career in a specific industry. You will benefit from valuable connections with top companies and recruiters.

## Explore, Build, Engage, Act, Evolve

With a 5-step structure of self-reflection, exploration and achievement, the program is tailor-made to help you find internships or positions in line with your ambitions and expectations. Each step will enhance your expertise about the market, as well as specific and detailed tips to perform effectively in the very competitive recruitment processes.

We are always up-to-date with the latest business trends. Our comprehensive careers tool kit ensures you always keep fully informed, up-to-date and prepared for interviews.

# Entrepreneurial Pathways

We focus on your entrepreneurial side. Are you planning to start up your own business or dreaming about becoming the fresh and innovative driving force within an organization?

We will equip you with skills, insights, and a curious mindset required to spot new opportunities, make connections, and bring new business ventures to life. Step outside your comfort zone, create innovative solutions, and dare to take action!

## Rome Business School for Entrepreneurial Pathways

**Dare to think differently. Dare to act innovatively.**

Rome Business School Entrepreneurial Pathways is designed to support our students in the following areas:

Discovering, testing and improving their entrepreneurial skills

Developing a business idea

Launching and growing their own business

Being competitive at a national and international level

1

### RBS4Entrepreneurship

This route is for students that are looking for:

**Entrepreneur Preseed** – People who have the motivation and interest and who are looking for the business idea that will allow them to become an entrepreneur

**Seed Entrepreneur** – In their mind they already have the business idea that they are interested in developing and they are looking for the right environment and the right help to develop it

**Growth Entrepreneur** – People who have a business and who have identified specific challenges in some processes or strategy

**Innovator** – People who work in a family business or a corporation and who are looking for methodologies that allow them to execute innovation initiatives

**The path** for those who create new routes in their professional life through new business ideas or by developing those ideas in their current business.

Our team will give students the boost they need to get started, get them on track towards their next challenge and turn their dreams or ideas into a business project with great projection.

The **entrepreneur's path** is a hectic road with many curves, many stages and many ups and downs.

And, to complete it, our team will give students all the support, tools and knowledge to overcome everything not only on a business level, but also emotionally.

The goal is not only to make student's dream come true into a real project, but to be able to maintain and manage it in order to obtain the greatest benefit when the time comes.

2

### Independent Employment

**This route is for students that are looking for:**

Development of their own career path

Networking

Being entrepreneur of themselves

Development of specific competences

Improving key skills

This path is for students that express the desire to start their own business on their own.

Our team will give students the support to start their own path in a chaotic environment, supporting them with talk with testimonials, workshops, guidance through bureaucracy and several hands-on sessions, to test their capabilities.

The goal is not only to set the basis for our students' goals, but to guide and support them in every stage of their path, from start to kick-off.

# 05 \_\_\_\_\_ Your Future

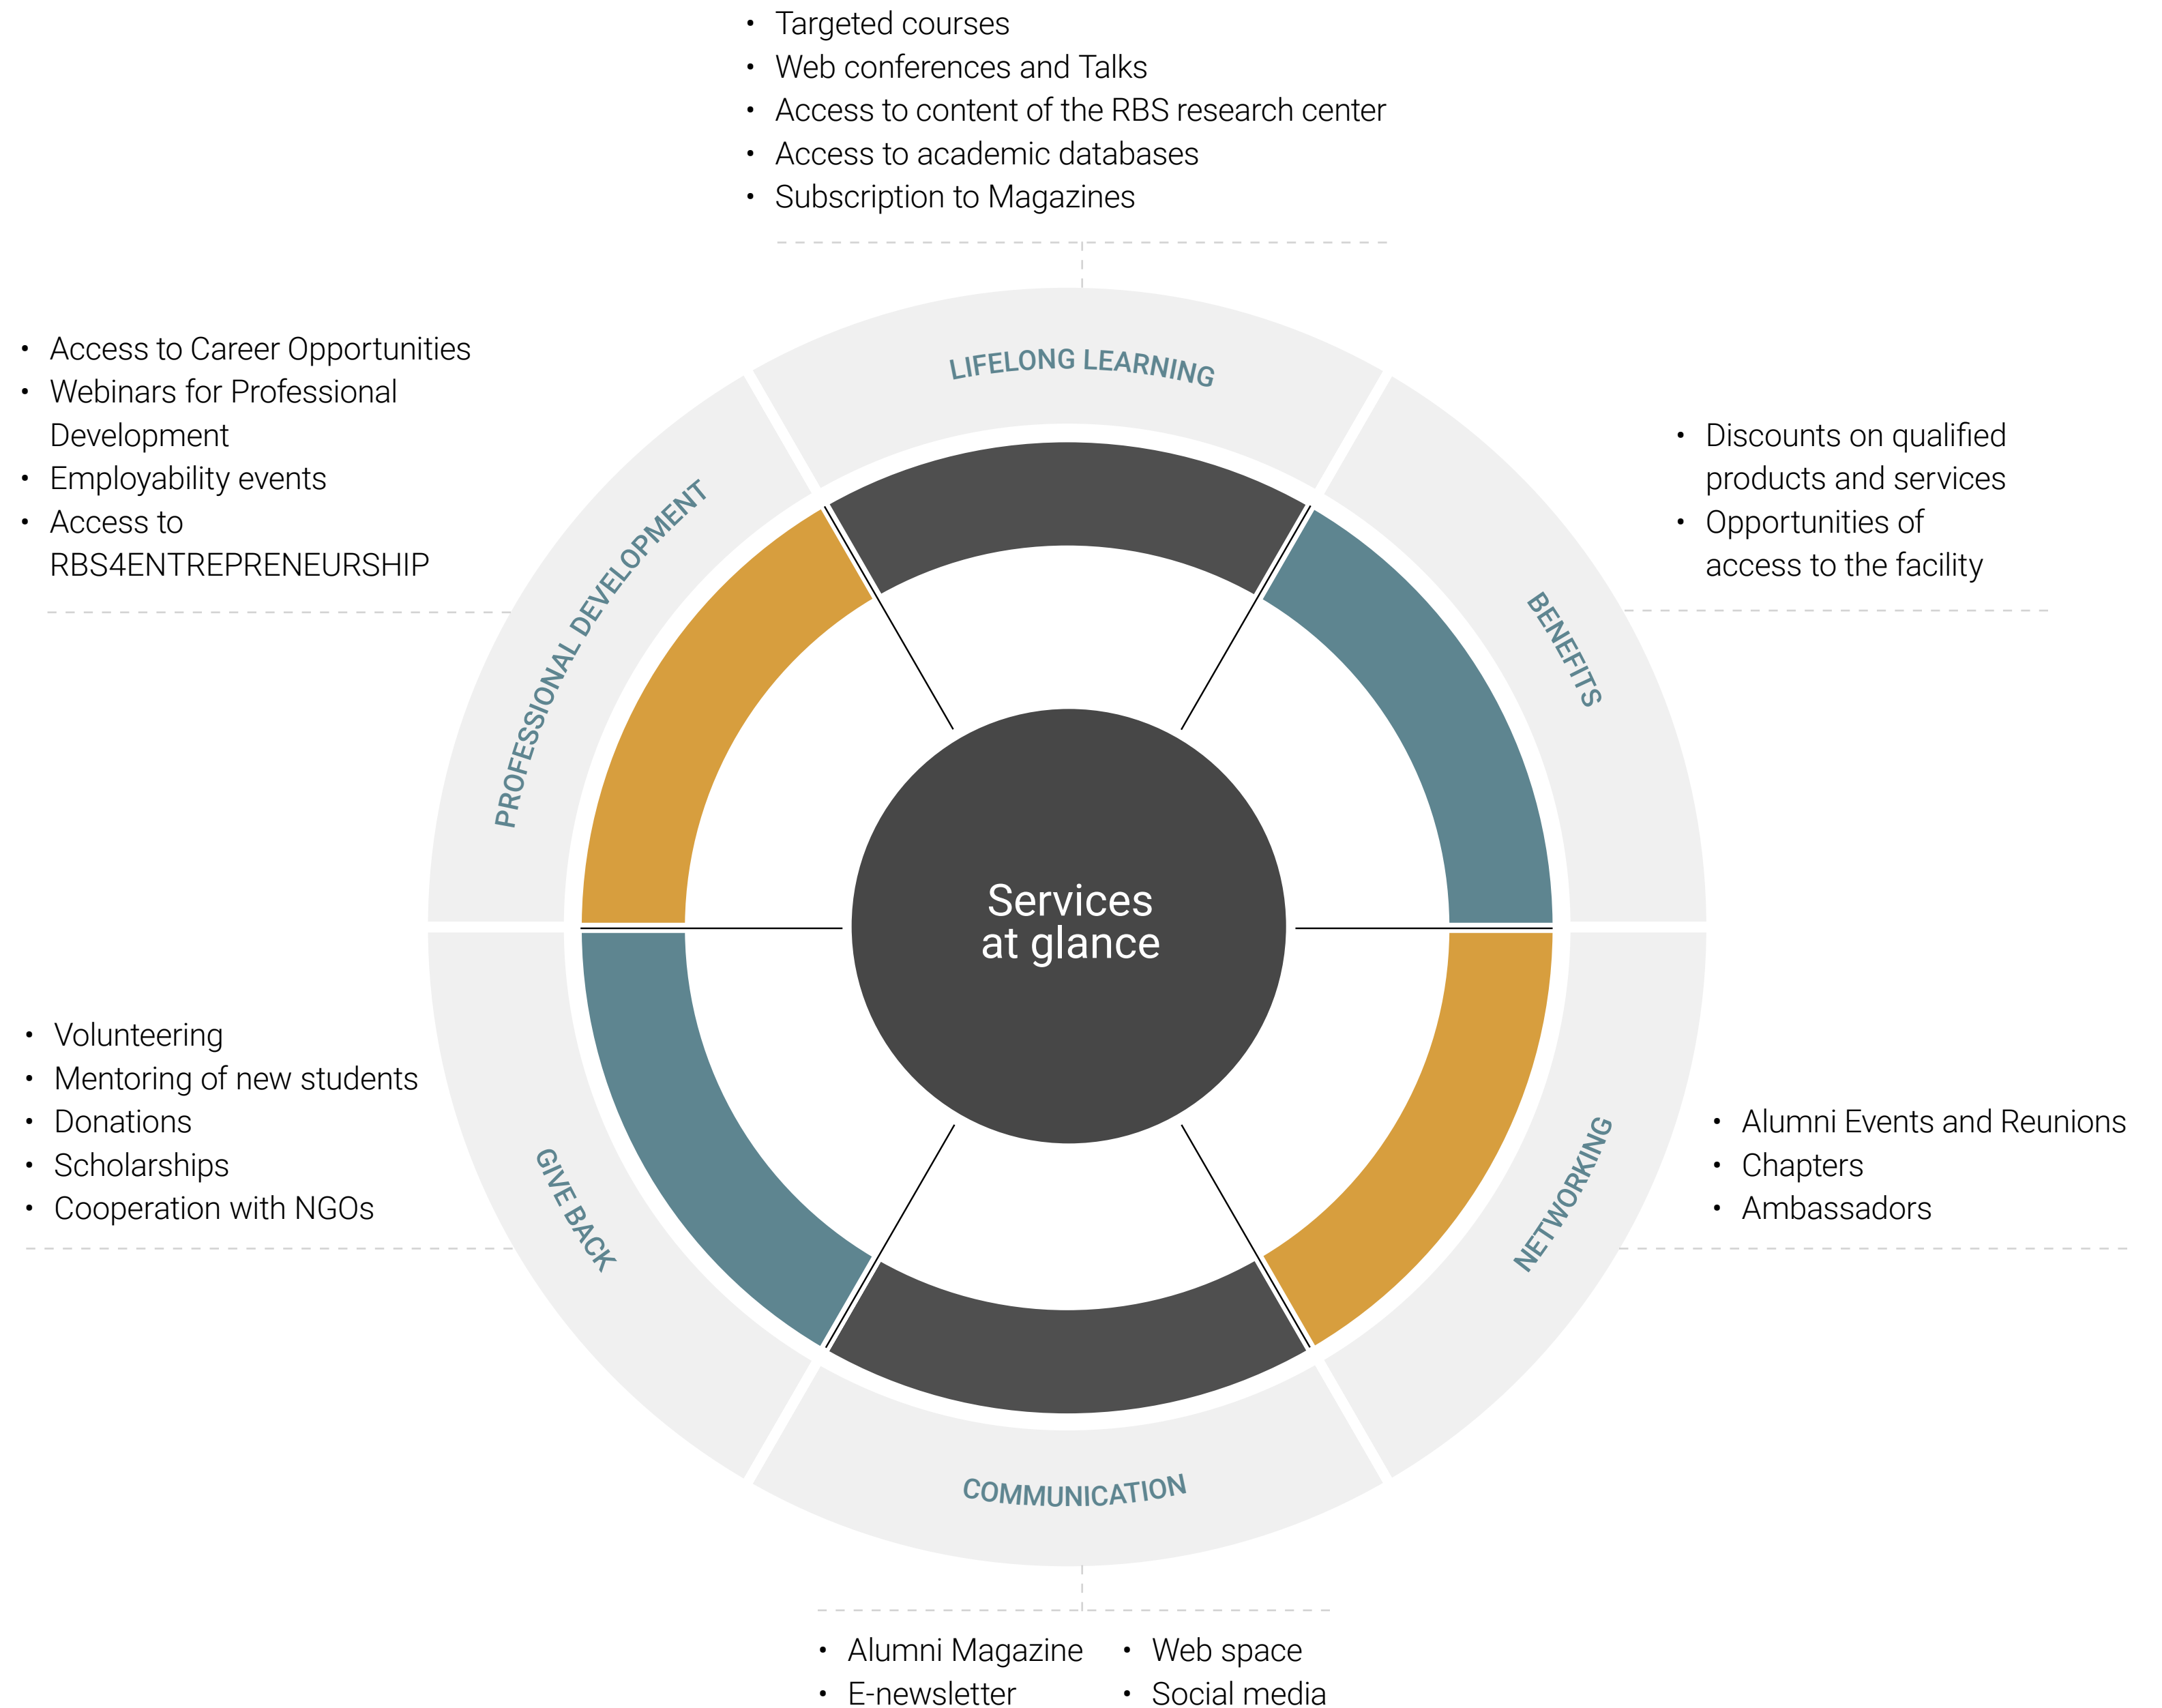

# Students for a while, Alumni forever

We believe deeply believe in sustainability and continuous improvement and the ability to generate a positive impact on society. That is why we inspire those in our Community to positively impact the world and build a better one by encouraging leadership and empowerment.

The strength of our Community lies in offering whatever it takes to continue to play an active role in the life of our Business School. With our Alumni, we co-create initiatives and experiences based on the values that unite us to support the continued growth of our Community.

A successful career is the result of a unique blend of exceptional skills and expertise, as well as constant professional development and a network of valuable, high-quality contacts. And we make all of this available to you.

Being part of our Community means having complete and exclusive access to the services and opportunities we offer you. But also, being a protagonist and promoter of initiatives dedicated to our Community and its future.

# Rome Business School's Better Managers

## Think Internationally!

Be a global professional, step outside your comfort zone, invest in your talent, refine your professional skills, join an extraordinary community in which you are encouraged to think outside of the box. We will help you to see challenges from different perspectives and transform them into new opportunities and real-world results.

# Experience RBS

## Expand your Boundaries

Expand your vision, get the chance to open your mind to new ways of thinking and opportunities, explore different campuses, and share experiences and insights with other multicultural teams.

Completing a portion of your studies abroad contributes to the development of transferable skills that highly valued by employers, therefore having a big impact on future job offers and career development opportunities. Step out of your comfort zone and learn from some of the best international realities in Europe and the world. Travel explore and immerse yourself in other cultural visions and ways of thinking, which challenge you to adapt and reassess the way you approaching difficulties. Get in touch with your most inner self and create your own international network of contacts.

# The Campus

Start your most international experience in the heart of Rome! Rome Business's School Campus is a prestigious building born in the 1911 in the heart of the Eternal city, a mixture of history and innovation.

Some of the most iconic Roman architectures, from the classic to the medieval trends, meets the latest innovation in the field of education and learning facilities.

A wide garden leave space to multiple networking opportunities, a pole of different cultures where creativity, differences and exchange create always new pathways and opportunities.

## The Campus

The building, designed by Achille Zinnari, was built for the 1911 Universal Exhibition. In that occasion, an Exposition celebrating the fiftieth anniversary of the Unification of Italy was also organized in Rome, and a national architecture competition was launched for the construction of ten villas. Among these, the Villino Avenali, now the Rome Business School campus.

Like many other beautiful buildings in the neighbourhood, Villino Avenali presents the typical features of the so-called “Roman baroque”, characterized by floral decorative elements, stuccos, pilasters in a classical style alongside medieval references that blend elegantly with typical elements of liberty. The study and restoration works of the building, maintain its aesthetic beauty completes with the most innovative technologies in terms of education.

## RBS Experience

Rome Business School works hard to ensure participants to experience all the social benefits of a student life. With this in mind, we regularly organize events and activities, networking opportunities, and knowledge exchange with different cultures and worldwide reality.

### Rome Business School Social Activities:

## At your disposal

Being the most international business school in Italy means welcoming students from all over the world and making sure they have the best experience possible while staying in the capital.

That's why we guarantee the top-quality Student Services facilities, from providing support to accommodation finding, to facilitating the student visa processes. Social events, international education experiences and a wider and comprehensive range of services to everyone who chooses to take of our higher education programs.

### Staying in Rome: Accommodation

Staying for a long period in a foreign city is a thrilling adventure, although adjusting to your new life can be quite overwhelming. Rome Business School has partnerships with renowned and customer-oriented accommodation providers whose services are designed to ensure you can start this exciting chapter of your life in Rome without stress and worries. For everything you might need, we are by your side to help you find accommodation in the Eternal City.

### Hit and run: Short-Term Stays

Rome Business School also provides support for short-term stays. Whether you need a little more time to find your permanent accommodation or your family is coming to visit, being a student at our school entitles you to a special price for several facilities.

### Rome Business School's - On campus student Identity Card

Rome Business School's students will receive a student card, which entitles them to access the RBS facilities and to get even more special discounts on several activities, services, venues, facilities and attractions. From visiting museums to leisure time, there's nothing Rome Business School can't help you with!

We are by your side at the Student Hub Services platform, providing support for finding accommodation to facilitating the student visa process. We organize social events and promote educational opportunities abroad.

### Visa Support à add a new section on VISA support for international students

Rome Business School provides support to get the Visa on time for your arrival in Italy; from the checking of the required documents to the getting in contact with the Italian Embassy to support the application.

### Staying in Rome, studying in Rome, experiencing everywhere

We know that, for our international students, starting a new experience away from their own country and comfort zone can be a bit overwhelming. Starting a new experience is a thrilling adventure but, as with every great experience, you might benefit from having a fixed point of reference.

07

# Welcome to Rome

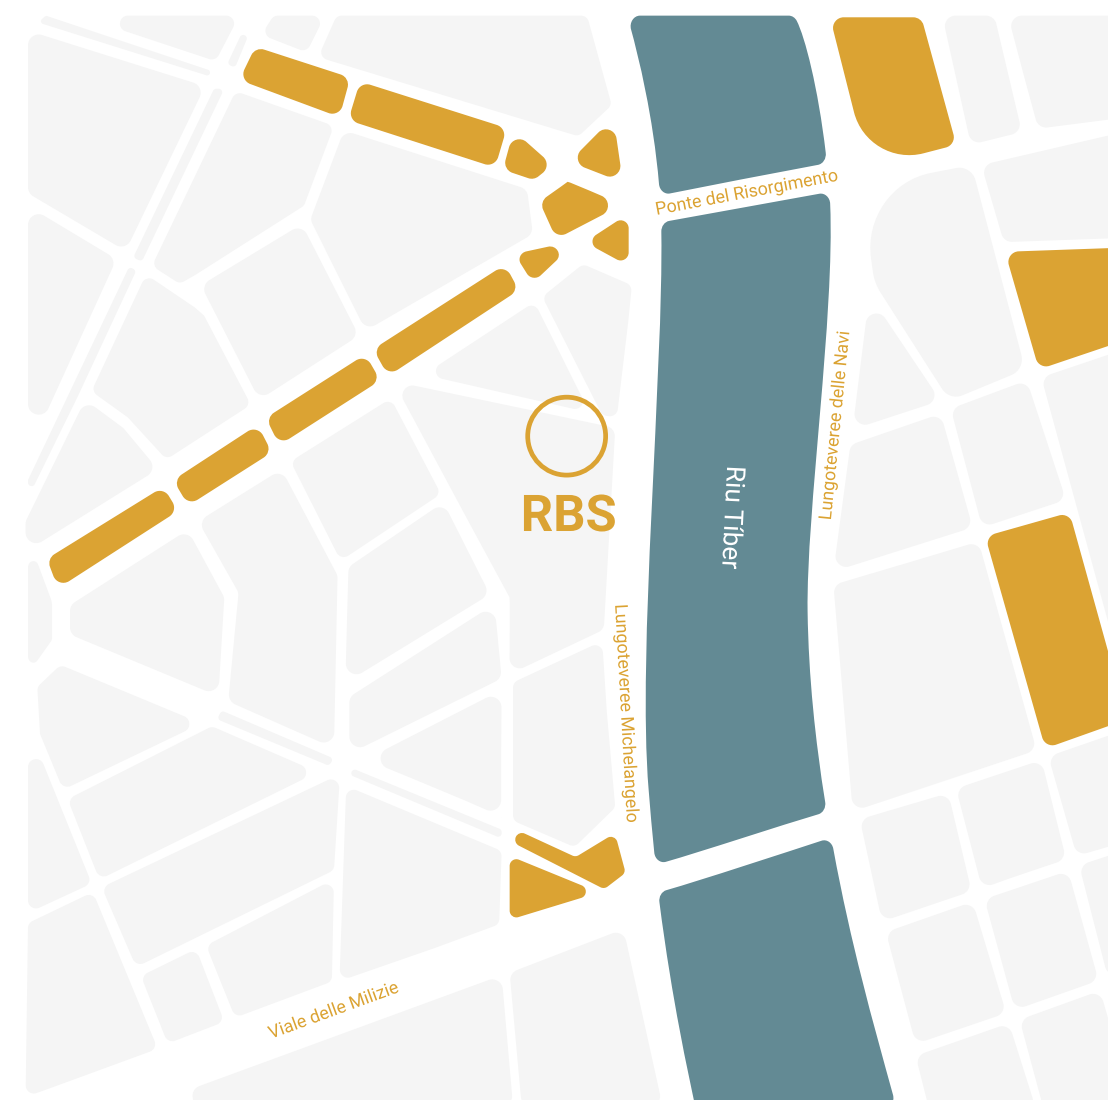

# Beyond the Classroom

The ultimate education experience in the Eternal City. The cradle of civilization and home to a priceless wealth of cultural and artistic heritage, Rome is the ultimate location to enjoy a higher education experience.

Studying with Rome Business School means, not only growing professional skills and competences but also having experience of living in the heart of Italy in one of the most fascinating cities of the world. We provide students with the best opportunities to get most out of their Master path and Rome is our main tool to do it. A networking center for a wide number of activities. With more than 650,000 companies registered in the region and over 1.000 new startups in the city, the Italian capital is the second leading city at a national level in terms of the number of new businesses.

## An ever-growing business ecosystem

It boasts 24 of the 30 specialized environments in the region, such as incubators, accelerators and startup studios, 5 centers for Technology Transfer, more than 20 institutions and associations aimed at spreading the culture of innovation and technology and 50 smart working centers. ## Double Certificates

Rome Business School's Master's Programs are accredited by the VIU – Universidad Internacional de Valencia, from which students receive 60 university credits (60 ECTS). Completing a Master's program at Rome Business School earns participants a double internationally recognized qualification: one from Rome Business School and the other from the VIU – Universidad Internacional de Valencia.

## Supporting our future leaders

Rome Business School is committed to developing future business leaders from diverse backgrounds. We support our students.

Education is not a privilege, but a primary necessity that should be accessible to everyone. This is what we believe at Rome Business School, which is why we award merit-based scholarships to outstanding candidates that succeed in demonstrating motivation and remarkable achievements in their area. These scholarships cover part of the total tuition fee.

### Financial aid

To apply for a partial scholarship, candidates must clearly state in their motivation statement why they should be considered for such a financial aid. In order to ensure the success of a partial scholarship application, the candidate should clearly demonstrate:

[Their professional goals and ambitions](#)  
[Why they should be awarded a partial scholarship over other candidates](#)
